2027 Rates & Budget Meetings in November

Monday, Nov. 16
5:30 p.m.
Board study session

Monday, Nov. 23
6 p.m.
Hearing for adoption of 2027 rates and budget

Participate in person or online
District offices at 7404 Yorkshire Drive or www.cpnmd.org

In November, the District Board of Directors will continue discussing and vote on proposed rate adjustments and the district budget for 2027. Customers are invited to participate in these public meetings.

Recommended changes include a 4% increase to water rates and 6% increase to wastewater rates. The proposed amounts are intended to keep pace with the cost of service and are competitive with other utility rates in our region.

In 2027, pipeline replacement, well rehabilitation, and other upgrades of more than $6.6 million are planned as part of our five-year plan to maintain reliable service to our community.

Visit www.cpnmd.org or scan the QR code for proposed budget and rate details.

Planning your holiday menus?

These simple tips can help protect your home and keep costly repairs off the table.

For more tips, scan the QR code or visit www.cpnmd.org.

Scrape Dishes Before Washing Them

Skip the sink, and scrape dishes into the trash before placing them in the dishwasher. Doing so will help avoid clogs and backups. And, you could save up to 6,000 gallons of water per year.

Place Foods with Fat, Oil & Grease in the Trash

Turkey drippings, potato skins, eggshells and butter are some of the foods that should not go down your drain. Fat, oil and grease buildup can cause backups, messes, foul smells, and are a potential health threat. Also, costs for emergency repairs can jump by 50% during the holidays.

Beyond the Kitchen! Never flush wipes down the toilet—even if the package says "flushable." Keep a small trash can nearby for convenience.
